EDUCATION

- **Arizona State University - Ira A. Fulton Schools of Engineering** Tempe, AZ
Master of Science - Computer Science; GPA: 4.0/4.0 08/2021 - 05/2023
Relevant Courses: Algorithms, Web Development, Distributed Systems, Blockchain Engineering, Software Security, Cloud Computing
- **PES University** Bangalore, India
Bachelor of Technology - Information Science and Engineering; GPA: 3.6/4.0 06/2015 - 05/2019
Relevant Courses: Data Structures and Algorithms, Computer Networks, Unix and Shell Programming, AI, Design Patterns

SKILLS SUMMARY

- **Languages:** Python, JavaScript, TypeScript, GoLang, C, Java
- **Web Dev Frameworks:** ReactJS, NextJS, Flask, Django, NodeJS, JQuery, Handlebars, Express
- **DevOps and Cloud:** AWS, Kubernetes, Docker, GIT, DynamoDB, Terraform, CDK, OpenStack
- **Databases and Tools:** PostgreSQL, MongoDB, Redis, Spark, UiPath, Kafka, Object Store, Spark

EXPERIENCE

- **CVS Health** Dallas, TX
Software Development Engineer - Fullstack 03/2023 - Present
 - **Claim Processing Platform (Node, React):** Collaborated in the development of a full-stack application designed for the collection of user information and the utilization of RESTful services to streamline business process automations.
 - **RPA Orchestrator (Python, UiPath):** Collaborated with cross-functional teams to develop a UiPath framework that automatically processes patient claims through business pipelines, resulting in a 30% reduction in processing time.
- **Arizona State University - SEFCOM Lab** Tempe, AZ
Graduate Research Assistant - Backend & Cloud Engineer 11/2021 - 01/2023
 - **FirmAE:** Contributed to an automated OSS framework that is responsible for crawling the web to extract 80k+ firmware images, emulations, and vulnerabilities from 100+ hardware vendors.
 - **Greenhouse:** Assisted in a research project under Dr. Ruoyu Wang which aims at finding 717 N-day and 26 zero-day vulnerabilities in firmware images when rehosted in a single-service Linux-based user-space emulation (QEMU).
 - **Binwalk(Python, Docker, AWS):** Created and integrated binary analysis workflows with backend services to reverse engineer and analyze targeted threats on firmware images.
- **Unbxid** Bangalore, India
Software Development Engineer - Fullstack 07/2019 - 08/2021
 - **Platform Integration(React, Express, ES6, TypeScript):** Spearheaded the successful integration of customer websites with the Unbxid platform, utilizing a robust tech stack to power seamless and low latency search results.
 - **JS SDK Plugin(Search, AutoSuggest, Rex):** Contributed to Unbxid OSS e-commerce search, typeahead, and React recommendation libraries which improved the sales by over 20% when integrated with customer sites.
 - **Python Catalog Pipelines:** Developed and deployed several data pipelines to AWS EMR that facilitate catalog indexing and data ingestion to power e-commerce search for 200+ customers.
 - **Argo Workflow Triggers (Python, Kubernetes, Argo, Docker):** Architected over 50 event-based workflow triggers for clients to schedule/invoke cron-enabled pipelines using RESTful Service/Dashboard.
 - **Apache Mesos - Chronos (Docker, Python, Helm):** Implemented a catalog preprocessing system built on Mesos cluster, which hosted over 3k data pipeline, featuring a master-slave re-election architecture and server threshold checks.
 - **PyConversion Library:** Developed a Python REST library to facilitate stream and batch multi-format catalog upload, buffering SMTP handler, failure detection and recovery. The current version is published on PyPi as 0.5.0(pyconversion).

PROJECTS

- **Reddito - React Web Application (NodeJS, ReactJS, MongoDB, NextJS):** Developed Reddito, a comprehensive full stack application using MERN stack to allow users to create accounts, login, and also to enable multi-user real-time updates which is hosted on vercel. (Aug' 23)
- **Video Recognition Service (Python, AWS, OpenStack):** Architected and developed an auto-scalable video classification service that adheres to CAP theorem principles and provides near real-time results. (May '23)
- **Sync Sphere - Multiuser File Sharing Service(ReactJS, NextAuth, TypeScript):** Designed and built a versatile full-stack cloud storage solution for seamless file synchronization, backup, and sharing across multiple users.(May' 23)
- **AWS Lex Financial Assistant Chatbot (Python, AWS - Lambda, Lex, DynamoDB):** Built an advanced NLP-based linguistic chatbot that assists end-users and financial institutions to make calculated banking decisions, providing them with insights on several asset classes and market sentiment. (April '22)

PUBLICATIONS

- **32nd USENIX Security Symposium - Greenhouse:** Published in USENIX Security Symposium at Anaheim, CA '2023 - "Single-Service Rehosting of Linux-Based Firmware Binaries in User-Space Emulation".
