**Respected Hiring Committee,**

I am writing to apply for the Back-End Developer at rightnow media. As an ambitious professional with teamwork proficiency and extensive 2+ years of Software Engineer experience, I was thrilled to learn about the opening. I believe that my professional background and industrialist drive make me an ideal candidate to fill this position.

My two years of experience as a Software Engineer at Unbxid helped me become an effective developer. Unbxid is a product-based company that implements AI-Powered e-commerce search & product discovery solutions for its customers worldwide. At Unbxid, my responsibilities involve writing data wrangling and data analysis scripts using the latest machine learning and visualization libraries. Along with incorporating advanced ETL solutions with the help of Hadoop and PySpark on AWS EMR (Elastic Map Reduce) for creating custom data pipelines to facilitate client catalog indexing. Furthermore, I have also contributed to the Unbxid search javascript library and integrated them with the client's website to help them grow and expand their businesses internationally to attain a broader outreach.

As a software engineer, I've been able to bring innovative and optimized architectural developments to circumvent complex data engineering problems using several open-source to achieve timely delivery of tasks. Alongside, I've been conducting interviews and onboarding new hires into the organization for various developer roles. Additionally, I've also managed a team of young developers where I delegate and assign work to individuals, perform code reviews, evaluate customer requirements and conduct security audits to identify areas of improvement. I have skillfully balanced organizational objectives and productive relationships, strategizing and recommending ways to achieve and maintain a competitive business edge.

Having the right blend of leadership background and technical skillset prepared me to become an overall contributing team member. As I constantly strive to strengthen and refine my professional effectiveness, I believe being part of the team sets me on the right career path. I would love the chance to discuss in greater detail how my qualifications meet the needs of this position.

Thanks for your time and consideration, and I look forward to hearing from you.

Yours sincerely,  
Tejesh Reddy Sigineni
